

The Creative YouthPower Consortium

Our Goals

Our Consortium empowers young people to navigate successfully toward a positive adulthood. Our aim is to harness the power of young people to realize their potential to achieve a thriving future for themselves, their communities and their nations.

We have three goals: put youth at the forefront of development, public policy and decision-making; support positive youth development within and across sectors; and strengthen the capacity of youth-serving institutions and systems.

Our Youth Reach

The Creative Youth Power Consortium has broad geographic presence and the ability to rapidly start-up and implement projects in culturally diverse environments through local partners and networks. Our partners have presence in 130 countries and territories globally.

The Creative YouthPower Differential

1. Youth First

We believe young people should be at the heart of every community development initiative as equal partners in education, health, economic empowerment and civic engagement.

2. "Disruptive" Approach to Positive Youth Development

Creating meaningful change means disrupting the status quo. Our innovations call on youth and our partners to take bold steps to catalyze change on the individual, family, community and state level.

3. Local Solutions & Sustainability

We begin with the end in mind. With local youth-serving partners, we develop context-specific approaches that sustain project gains beyond the life of any single intervention.

4. Measurement, Results & Scale

Measuring and evaluating project outcomes is critical to strengthening our work and transforming the lives of youth and their communities. Our partners bring proven evidence-based approaches that can be taken to scale to achieve enduring results.

Our Team:
